Overview

As a course project, all participants of the class must craft a basic web-based twitter client application.

Features

- Login into account.
- List tweets of a given account.
- Tweet something to Logged Account.
- Search tweets by keyword.

Non functional:

- Elastic Layout.
- Cross-browser compatibility (IE8+, Firefox, Chrome, Safari)
- Project structure following good practices.
- Widget-based architecture.

Extra points:

- Original design.
- Usability concepts applied.
